

# Introducing our stunning new Skyview louvred roof for relaxed, outdoor living in sun, shade or rain

Get the best of both worlds with our locally designed, remote controlled, opening and closing rooves.

## IT'S ALL ABOUT LIFESTYLE. **YOU are in control.**

Open louvres to let the sun shine in. With a full range of motion you can regulate shade, shelter and ventilation. Keep them open at night to see the stars!

Close louvres to keep out the weather. You'll have solid rain protection and a beautiful flat ceiling effect when the roof is shut.

Rain sensors ensure that the roof closes automatically if it starts to rain.

*Our custom extruded aluminum blades are  
200mm wide*

Built to last these rooves come with a guarantee and are available in a large range of colours and sizes. We can fit the louvred roof to enhance the look of your existing outdoor area or if you've always dreamed of extending your home with an inside/outside room we can build one for you.
