The most effective way to control overheating is to stop the sun reaching the window in the first place.

ENVIRONMENT - External products can eliminate 90% of internal heat gain, and external sunscreening reduces the energy used and greenhouse gasses emitted by air conditioning.

FORM - we manufacture good looking sun control solutions.

FUNCTION - premium quality products designed to last.

SOLUTIONS - our range can solve most sun control problems.

maxim external venetians

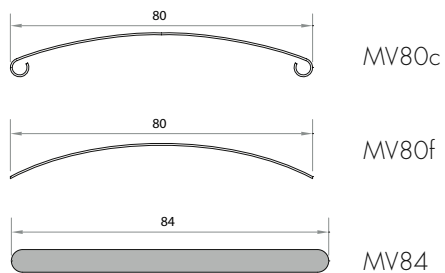

adjustable and retractable blades

blade

- MV80c curved blade, aluminium
- MV80f flexible blade, aluminium
- MV84 84 x 6mm cedar

controls

motorised, manual, automatic, wind sensor, light sensors

benefits

- blades can be fully retracted and tilted
- up to 90% reduction in internal solar heat gain
- reduction in cooling costs and greenhouse emissions
- privacy

note

these louvres should be positioned as close to the glass as possible or they will be susceptible to wind damage.

adjustable non-retractable continuous blades

vertical support arms are positioned behind the blades

blades

- MC75 curved extruded aluminium blade, 75mm
- MC85 flat extruded aluminium blade, 85mm
- MC74 cedar blade, 74 x 10mm

controls

fixed, manual, motorised, automatic
(can be linked to lux sensors)

benefits

- reduction in cooling costs and greenhouse emissions
- up to 90% reduction in internal solar heat gain
- privacy
- wind barrier

maxim continuous louvre

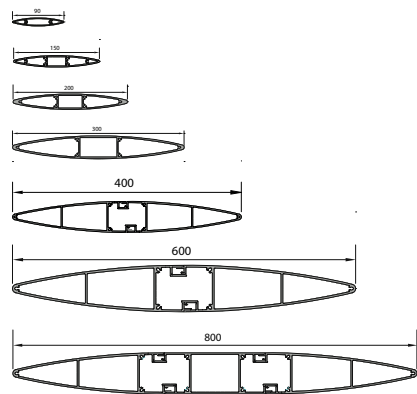

maxim
louvers

elliptical blades adjustable or fixed

blade sizes

90mm, 150mm, 200mm, 300mm, 400mm, 600mm, 800mm

options

vertical or horizontal blades, motorised, manual, fixed

benefits

- reduction in cooling costs and greenhouse emissions
- up to 90% reduction in internal solar heat gain
- privacy
- wind barrier

maxim fins

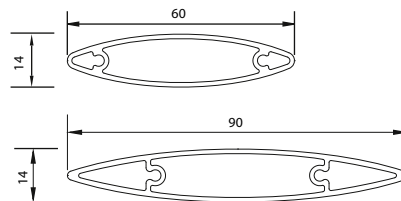

aluminium frame and blades
elliptical blades fixed or adjustable

blade sizes

60mm, 90mm

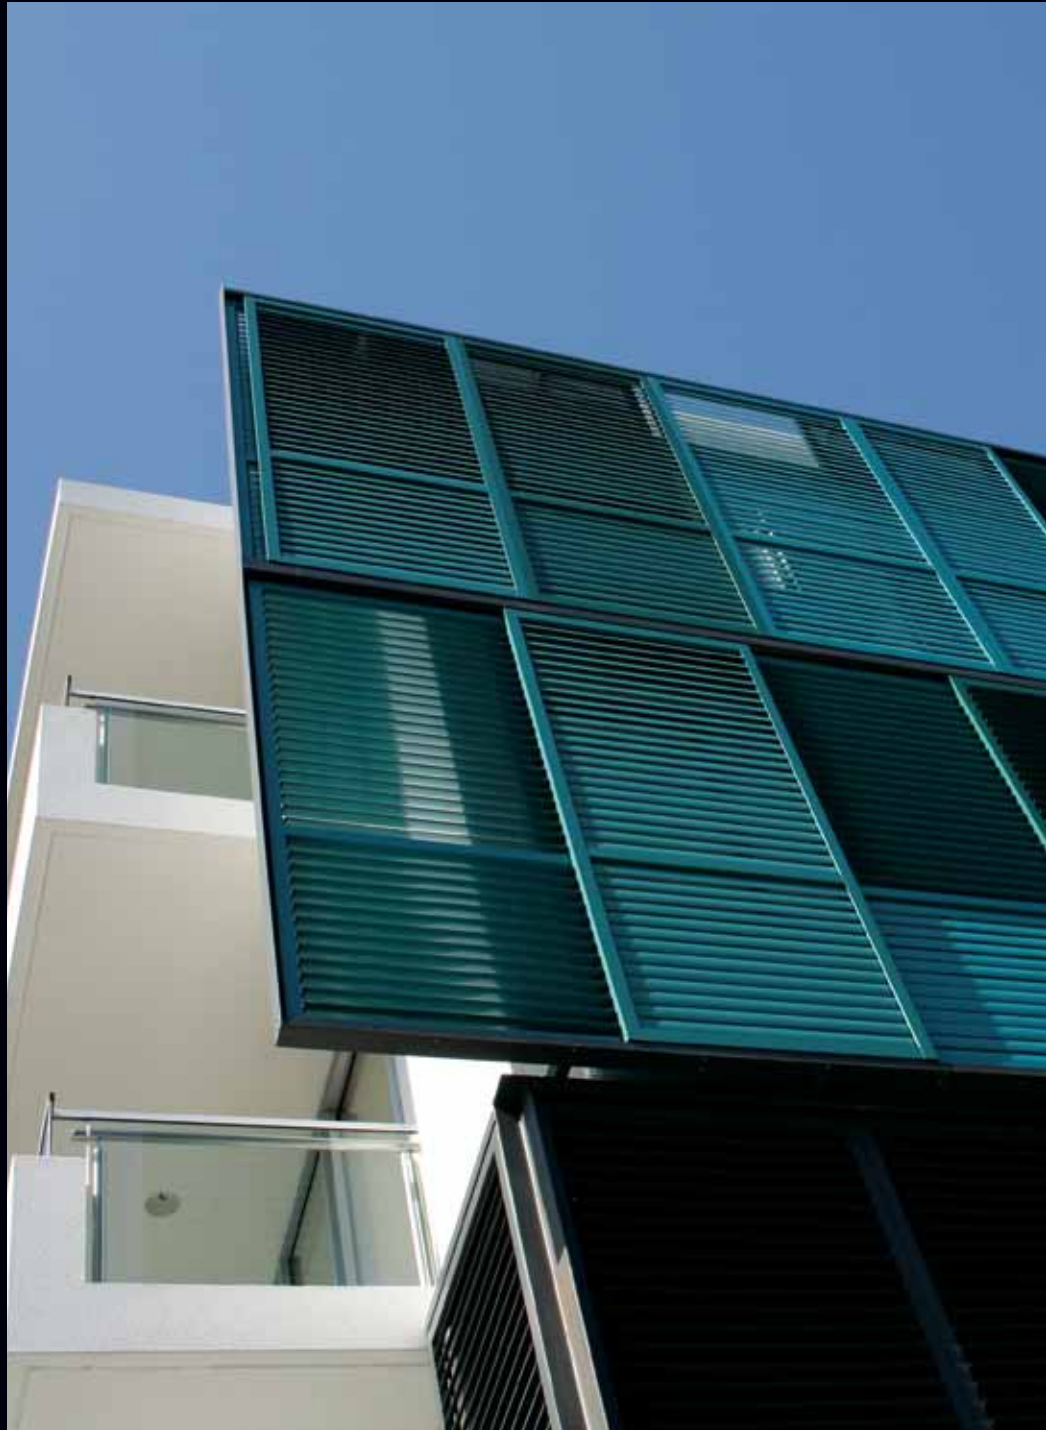

options

sliding, folding, stacking, fixed

benefits

- reduction in cooling costs and greenhouse emissions
- up to 90% reduction in internal solar heat gain
- privacy
- wind barrier
- can be motorized (90mm only)
